

Prof. Joel Kovel author of **Overcoming Zionism**

Creating a Single Democratic State in Israel/Palestine

Kovel demonstrates that the Zionist project has been from its outset a colonial one, and thus an aberration from traditions of respect for human rights, including those of Judaism itself. The primary conclusion he draws is that the road to peace is the dismantling of Zionist ideology as a whole and putting in its place a construct based on Universal human rights.

Thur Oct 29, 7pm, E5

(fifth floor of 33 Harrison Ave - near the Downtown Crossing subway)

E5 Forum is very comfortable with having as few as five and as many as fifty people at an event. The point of the event is not the numbers but, in the spirit of the Social Forum process, building productive social relationships across political and thematic differences - hence the comfort with a small audience. After the event - at around 9pm - we usually all go out for dinner at a nearby restaurant.
